

Yorkland Controls Adds Security- Asset Protection to Building Control Systems

System now offers integration of HVAC and security control.

Toronto - (January 2007) - Yorkland Controls, Inc., a leading controls distributor and solutions provider is expanding its building control system offering to include Security (Access /CCTV). Facility Explorer Asset Protection offers customers a comprehensive system of security products in a single, integrated, standards-based solution. The added security capabilities include access control, video surveillance, and alarm management and monitoring.

By including asset protection capabilities, Yorkland Controls is broadening its ability to offer scalable building control systems that are flexible and suited for a wide range of facility management applications.

The NovusEdge EdgeProtect™ product by Johnson Controls is the main component of the Facility Explorer Asset Protection solution..

“With Johnson Controls integrating the EdgeProtect solution into Facility Explorer, Yorkland can provide customers with greater efficiency and reduced costs along with the latest in building automation and asset protection technology”, according to Joe Soil, Manager-Installation Development.

"Customers want intelligent building systems that are based on open standards, providing an integrated, flexible, and single source to manage physical security and environmental control. Yorkland is well positioned to deliver this integrated or stand-alone solution to our customer base." said Gerry Cellucci of Yorkland Controls.

About NovusEdge

NovusEdge, headquartered in Austin, Texas, is a leading provider of complete physical security solutions that control access, monitor environments, and manage alerts to protect high value assets. Its EdgeProtect product is the first fully integrated solution that delivers IP-enabled, automated controls via rules-based functions, in real-time, at the point of need. The company's EOE (Edge Operating Environment) architecture utilizes embedded intelligence at the edge of the network that enables automatic and dispersed response in remote locations with reduced impact on network resources. For more information on NovusEdge, visit the company's web site at www.NovusEdge.com.
