

PRESS RELEASE
TORONTO, June 24, 2015

Yorkland Controls Ltd is pleased to announce representation of BADGER METERS by Data Industrial.

An industry leader in flow metering and control technologies, Badger Meter Flow Instrumentation manufactures products and solutions that measure whatever moves through a pipe. Customers rely on their wide range of solutions to deliver the accurate and dependable flow data and control essential for their applications, including HVAC and Industrial markets,

“With the addition to Badger to our offering, Yorkland is well positioned to provide the product and energy monitoring solutions to our customers’ who need accurate, and reliable data for their applications”, says Gavin Barrett, President of Yorkland Controls Limited.

“Yorkland offers several suites of monitoring, targeting, analytics and optimization software. The software can only be as effective as the accuracy of field flow sensors and flow measurement devices that Badger offers”, adds Gerry Cellucci, Vice President of Systems Solutions of Yorkland Controls.
