

Belimo 101:

Introduction to Belimos' Actuators,
Control Valves , Retrofits & Sensors

Free Training | Limited Seats Available

Learn the fundamentals of HVAC control components in a hands-on Belimo 101 training at Yorkland Wiles Legault Ottawa.

Participants will explore how Belimo products are applied within commercial HVAC systems, with a focus on proper selection, operation, and best practices to ensure system efficiency and reliability.

- Fundamentals of air damper actuators and their role in HVAC systems
- Overview of hydronic control valves, including control concepts and applications
- Introduction to sensors and meters, with an emphasis on accuracy, performance, and system integration

**Attendees who complete the course successfully will receive their Belimo University certificate.*
